Police: 3 Dead in Movie Theater Shooting, Including Gunman

(AP) – A lone gunman sitting in a packed movie theater stood up about 20 minutes into the showing of "Trainwreck" and began firing into the crowd, killing two and injuring at least seven others Thursday night before fatally shooting himself, authorities said. Police described the shooter as a 58-year-old "lone white male" with a "criminal history" but did not immediately disclose his name. They evacuated the entire theater complex and conducted a sweep inside the building. State Police Col. Mike Edmonson said investigators found suspicious items inside the shooter's car and were going to set off explosions in the vehicle. Minutes later an Associated Press reporter on the scene heard a number of short bursts similar to firecrackers coming from that vicinity. Stories of heroism immediately began to emerge with presidential hopeful Gov. Bobby Jindal, who traveled to the scene within hours of the shooting, telling reporters that a teacher who was in the theater jumped in front of a second teacher, saving her life. The second teacher then managed to pull a fire alarm to alert other moviegoers, he said. Seven people ranging in age from their late teens to their late 60s were injured, said Lafayette Police Chief Jim Craft. Craft said at a news conference that police know who the gunman is, and that he had a "criminal history," but they are not immediately releasing his name.

Turkish Jets Hit Islamic State Positions in Syria: PM's Office

(Reuters) – Turkish fighter jets pounded Islamic State targets in Syria early on Friday, the prime minister's office said, after Turkey said it would take any "necessary measures" to protect itself from Islamist and Kurdish militant attacks. Police, backed by helicopters and special forces, also launched overnight raids on more than 100 suspected Islamic State and Kurdish militant locations in Istanbul, according to media reports. Some 5,000 officers were deployed in the operation. Three F-16 fighter jets took off from a base in Diyarbakir, southeast Turkey, in the early morning and hit two Islamic State headquarters and one "assembly point" before returning, the Prime Minister's office said in a statement. A cross-border firefight on Thursday in the same area between the Turkish army and Islamic State left one militant and one soldier dead. Broadcasters CNN Turk and NTV reported that anti-terror police raided more than 100 locations across Istanbul. The Prime Minister's Office said on Thursday that Turkey will take any necessary measures to protect public order and national security following attacks by Islamic State and Kurdish militants.

Weather of Concern

- No significant Weather Watches or Warnings are in effect.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Near to slightly below temperatures will continue across the interior through the weekend, with near to slightly above normal readings along the coast. Temperatures will increase to above normal throughout the interior by early next week, and mostly dry weather will persist through the end of next week.

Medford Weather:

The upper level trough that is currently bringing cooler temperatures will move out of the area today, but it will quickly be replaced by a second, broader trough through the weekend. A slight chance of showers is forecast for Saturday along the coast, east of the Cascades and north of the Umpqua Divide. On Sunday some isolated thunderstorms are possible in the afternoon and evening for northern California and east of the Cascades. The broad upper level trough will move to the east on Monday allowing high pressure to build back into the region and a dry pattern to return. Temperatures will begin a sharp upward swing through the first half of next week.

Reno Weather:

Some lingering clouds will persist today as an upper low weakens and drifts eastward. A drier air mass with seasonable temperatures will continue into the weekend. Typical afternoon zephyr breezes expected the next few days with stronger winds expected Sunday as the next trough approaches. Hazardous boating conditions and possible fire weather concerns are possible by Sunday afternoon.

San Francisco Weather:

A slight warming trend is expected to begin today with temperatures holding near or slightly below seasonal averages through the weekend. A more robust warmup and continued dry weather conditions can be expected for the first half of next week as high pressure builds over the region.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Mainly dry weather is expected across the area through next week. Daytime temperatures will be a little below normal through the weekend and then climb to above normal by early next week. Triple digit heat is expected throughout the central valley for mid to late next week.

Hanford Weather:

Dry westerly flow aloft will provide the region with mainly clear skies and near normal temperatures through early next week. High pressure will strengthen over the area by the middle of next week and provide for a warming trend.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

There will be patchy low clouds and fog with mild conditions across coastal areas, while inland areas warm up a few more degrees today. Low pressure will pass by to the north and bring a slight cool down Sunday into Monday. High pressure will re-strengthen over the forecast area by midweek, with temperatures increasing to above normal high across inland areas. There will be increasing monsoonal moisture late in the week.

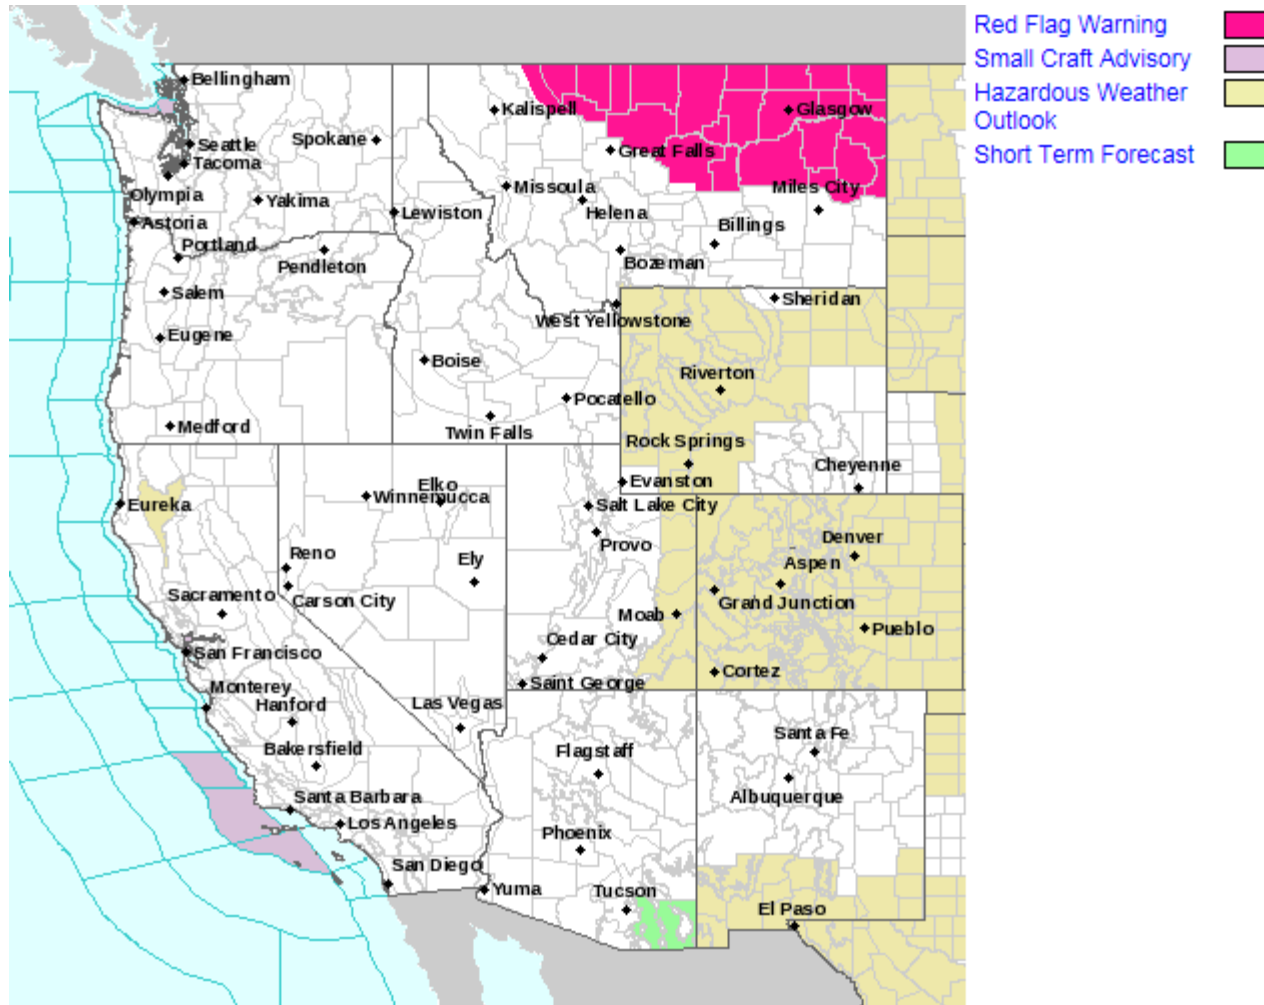

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Fair weather will continue through early next week as a low pressure trough keeps dry southwest to west flow over the region. Temperatures will mostly be near or just a little bit above seasonal normal, and night and morning low clouds will occur near the coast. High pressure aloft will build by the middle of next week and bring higher temperatures and possibly some moisture from the southeast, with a chance of mountain thunderstorms possible by next Friday.

Southeast California Weather:

The region should remain dry today and through the weekend. Storm chances should increase area-wide next week. As for temperatures, expect a gradual rise through the weekend with desert highs approaching the 110 degree mark in spots.
